PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building intelligent mobile and web applications using **React Native**, **Node.js**, **REST APIs**, and **Firebase**. Currently focused on integrating **generative AI** into modern applications to optimize development workflows and deliver scalable solutions.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, React Native, React, Next.js, Bootstrap, Tailwind CSS
- **Backend:** Node.js, PHP, MySQL, PostgreSQL, Firestore DB
- **Tools & Platforms:** Git, GitHub

EXPERIENCE

AI & IT Programmer Intern

Tailin Abrasives Corporation | Nov 2025 - Mar 2026

- Designed and deployed **5 AI-generated video orientations** across different departments, reducing onboarding time from 1-2 hours down to **15-45 minutes** per session, cutting orientation delivery time by up to **75%**.
- Created a **process optimization solution** using Microsoft Excel with advanced formulas, reducing per-task processing time from 9:49 minutes to **4:41 minutes (52% faster)** and cutting total daily workload from 6-7 hours down to **3-4 hours**, saving approximately **3 hours per day**.
- Designed and developed a **General Ledger web system** to replace the company's **fully manual accounting process**, automating **dual-currency (PHP/USD) bookkeeping**, journal entries, trial balance, Excel import/export, and deployed it to the company's **local server**.

PROJECTS

FitFusion360 | <https://seannyboyyy.github.io/FitFusion360/>

- Built an **AI-powered fitness and nutrition mobile app** featuring food vision recognition, personalized 28-day workout plans, and clinical-grade nutrition algorithms.
- Integrated **Google Gemini AI API** for real-time meal analysis and adaptive meal plan recommendations.
- Designed nutrition algorithms referencing **12+ peer-reviewed studies** for clinical accuracy and reliability.

CraveSense | <https://seannyboyyy.github.io/CraveSense/>

- Developed a mobile app that suggests food based on user **mood, dietary preferences, and past selections** using a recommendation engine.
- Built an **interactive chatbot feature** for real-time food discovery and personalized suggestions.
- Integrated **TheMealDB API** for real-time food discovery with detailed recipes and embedded **video tutorials**, enhancing user engagement and providing a guided meal preparation experience.

EDUCATION

Bachelor of Science in Information Technology

Lyceum of Subic Bay | 2022 - April 2026
